

Daniel Young

Full Stack Software Engineer

linkedin.com/in/dansalias

github.com/dansalias

iamdan.me

10+ years building SaaS—primarily with TypeScript, Vue, Node, Linux, Docker and AWS.

Experience

~~Unemployed~~ Sabbatical

April 2023–present

Failed at 2 startup attempts. Travelled to 7 new countries. Currently learning Rust and experimenting with machine learning with a focus on better code generation.

Senior Frontend Engineer

May 2019–April 2023

LoveToKnow Media—Barcelona, Spain

- Built news and reference products serving 100 million pageviews/month.
- Managed a cross-product advertising library responsible for \$1million/month revenue.
- Updated sites and advertising integrations for GDPR compliance.
- Migrated production sites to a centralised design system to ease product workloads.

Frontend Developer

February 2016–May 2019

Freelance—Auckland, New Zealand

- Led frontend development of the YourDrive peer-to-peer car rental app (discontinued).
- Built the client dashboard for Quicksense Education.
- Developed the user dashboard for MyBalance in partnership with Dow Goodfolk.
- Built movieXchange with Phosphor Essence.

Backend Developer

January 2015–January 2016

Weirdly—Auckland, New Zealand

Led backend development of the Weirdly SaaS application, creating culture-fit quizzes for multinational companies and 100,000+ candidates.

- Architected and led a live migration from SQL to MongoDB.
- Built the recurring billing system and accidentally double billed everyone one month.
- Integrated AI sentiment analysis.

Qualifications

Bachelor of Engineering (Mechanical)

Graduated 2016

The University of Auckland
